

CAPITAL FINPLUS ACADEMY

Welcome Guide & Getting Started

Welcome to the CFA Trading System

You're now part of a community of traders who are done with guesswork, indicators with no logic, and chasing the next "sure-shot" tip. This guide is your starting point — read it before you open your first chart inside the course.

What You'll Learn

- How markets actually move — structure before indicators
- The complete CFA Trading Framework, step by step
- How to build and validate a setup through backtesting
- Risk management that protects you on your worst day
- The psychology behind consistent execution

How to Use This Course

1. Start with the foundation modules before jumping to advanced setups — the order matters.
2. Watch each session once for the concept, then a second time taking your own notes.
3. Backtest every setup yourself before risking real capital on it.
4. Use the Daily Post-Market Analysis to track how today's setups actually played out.
5. Bring questions to your live sessions — don't sit on confusion.
